

Langdale Terminal Redevelopment Plan

What's Happening?

In 2013, BC Ferries created a Terminal Development Plan (TDP) to help improve the safety, efficiency and customer experience at the Langdale Terminal. This 25-year plan identified both short-term and long-term improvements to the terminal.

We are out again to present the design direction of the first phases of the Plan which includes improved circulation, landscape enhancements and a new terminal building and foot passenger waiting lounge.

In addition to keeping you up-to-date with the work done so far, we are looking for input on a few key areas:

The future playground

Arts and cultural Installations

Landscape improvements

EV charging stations

Provide your feedback today for a chance to win a ferry pass!

Project Timeline

The timeline below outlines activities relating to the Terminal Redevelopment:

WE ARE HERE

Langdale Terminal Redevelopment Plan

You Spoke, We Listened:

1 Improve on-time performance by making loading more efficient

New overhead walkway and gangway will make the pedestrian experience more comfortable year-round and speed up the loading process by moving foot passenger loading from the car deck. Changes in car and bicycle circulation will make arriving and departing the terminal feel more intuitive and safe.

2 Make the waiting area comfortable, all year long

The new terminal building will enhance comfort through substantial exterior covered areas and an indoor waiting lounge that includes vending machines, phone charging stations and washrooms.

3 Ensure accessibility for all ages and all abilities

The overhead walkway will improve passenger loading safety, especially for those with mobility issues. We also have made improvements to the bus and vehicle areas, ensuring they are close to the pick-up and drop-off locations and provide weather protection.

4 Provide additional and improved food options

Food options will be explored in future phases of terminal development.

We Want to Hear From You:

What makes a great playground?

What art and cultural installations resonate with you?

What do you define as pleasant landscaping?
